

**Parameterized Task**

cmd: [\[Save\]](#) [\[Run\]](#)

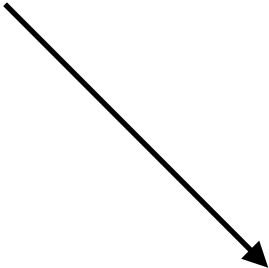

## Task Code

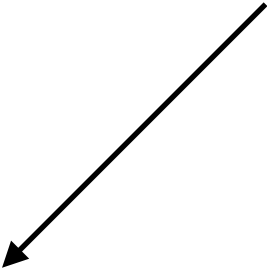

```
1 __TASK_NAME__ = "demo/demo_1_task"
2 __ENV__ = 'aliyun'
3
4 def task(count)
5     count.times do |i|
6         $logger.call "the #{i} run"
7         sleep(1)
8     end
9 end
10
11 def main()
12     time = Time.now()
13
14     param = 10
15
16     task(param)
17
18     time = Time.now()-time
19
20     return "takes <span style='color:red'>#{time}</span> seconds"
21 end
22
```
